I am writing in repsonse to the CLP and ALP submissions.

I have to say its submissions in the Darwin, Palmerston, Darwin Rural and Alice Springs are pretty
accurrate except transferring 253 electors from Karama to Sanderson. Instead the commission should
transfer SA1 7100906 from FONG LIM and its 158 electors and SA1 7101204 from FONG LIM and its 11
electors to Sanderson. This would increase Sanderson by 169 electors to 5765 electors and decrease
Fong Lim to 5,739 electors. I would also reverse the changes of moving SA1 7101005 and its 263
electors to JOHNSTON and reverse moving SA1 7102304 and its 260 electors to NIGHTCLIFF. This change
would increase Casuarina to 5,988 electors and increase Johnston to 6,093 electors and decrease
Nightcliff back down to 5,982. Making a more even spread,

The Remote does however trouble me though I do agree with moving "Gwoja be increased by incorporating
SA1 70205106802 and 70205106808 from Daly" This increases Gwoja to 5,717 electors and reduces Daly to
5892 electors. These changes should be supported as they bring most divisions closer to the Average
District Enrollment.

The one other change that is necessary is Arafura being under quota and Mulka being over qouta so I
agree with the Labor proposal to move SA1 7106318 and its 665 electors from the area of Ramingining
from Mulka to Arafura. This change would increase Arafura to 6,200 electors and decrease Mulka to
5,856 electors. Goyder would then gain SA1 7105715 from ARAFURA and its 11 electors and SA1 7105717
from ARAFURA and its 114 125 electors. This change would increase Goyder to 6,087 electors and
decrease Arafura back to 6,075 electors.

I hope both parties will accept these changes and support them.
